## Fitment Guide

**Yamaha  
YZF-R1 2004**

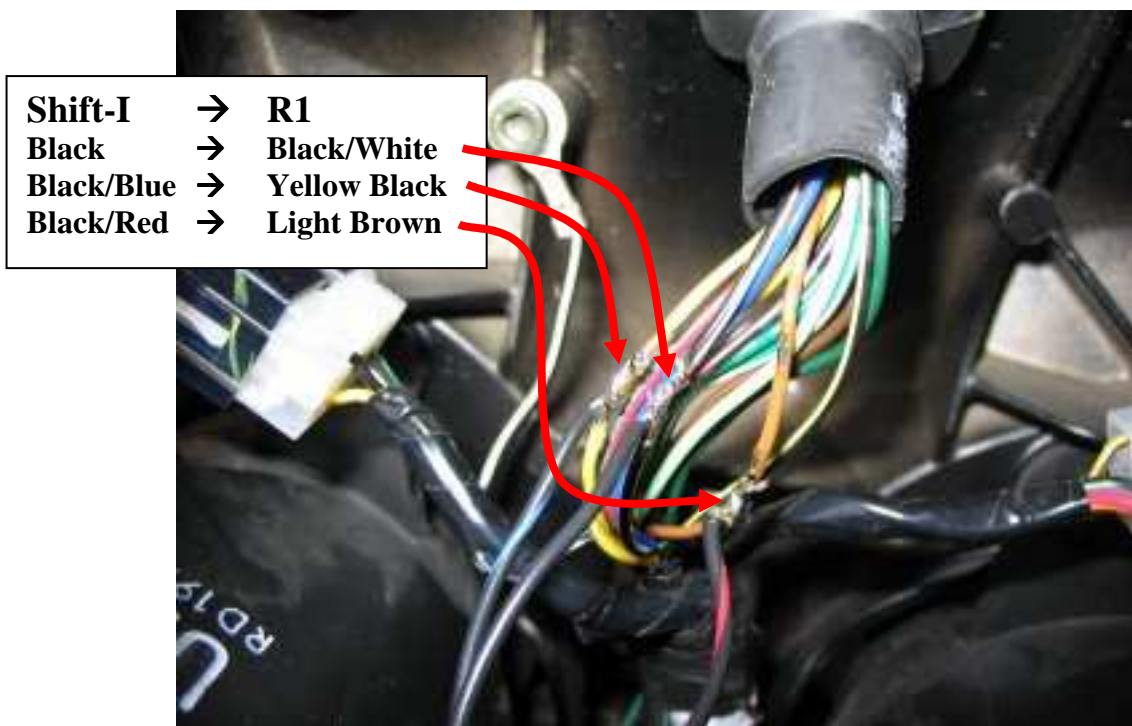

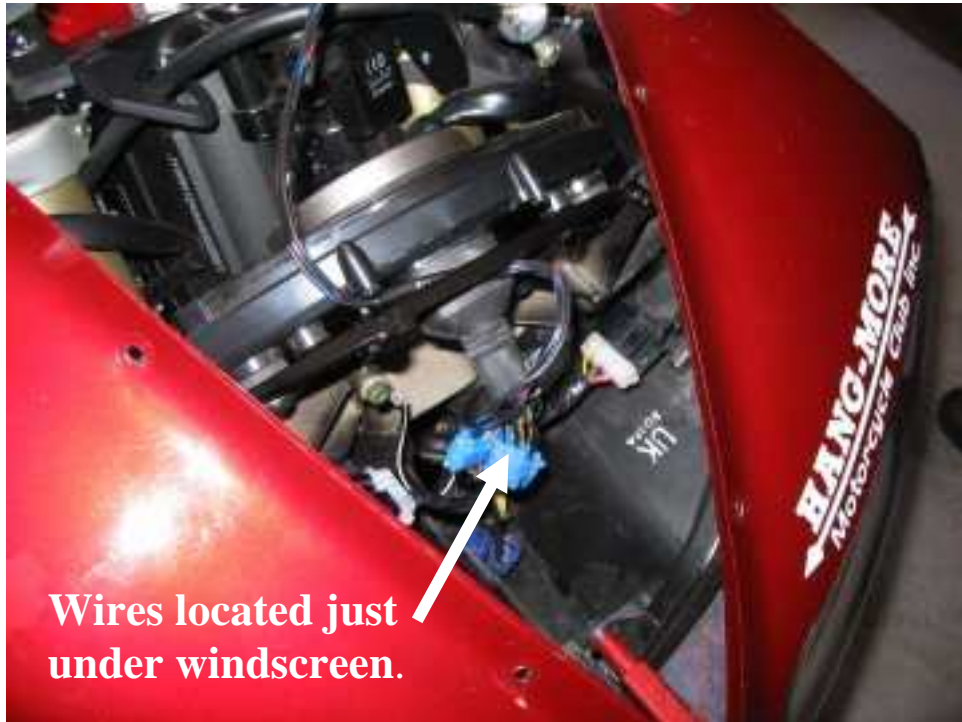

**V1.0**

**Ecliptech Innovations Pty. Ltd.**

The R1 wires are really easy to get too.

Once the windscreen is off, you have access to all 3 wires you need.

You can also attach the wires with wire clips (shown below), however you need to make sure a good connection is made so you don't get intermittent operation.

Tape the wires back up.

Mount with double sided pads provided,  
or make a bracket to mount from behind.

Fully lit up....  
<brightness is adjustable>

Colours are rich  
blue and red,  
camera does a poor  
representation.

Only one thing left to do...
